

Incline Pines HOA homeowner-installed EV charger enclosure

Front view

Side view

Notes:

Entire enclosure can be built with one 4' x 8' sheet of 3/4" exterior grade plywood

Use plenty of wood glue and finish nails to join the surfaces

Build a frame of 2" x 2" on the inside bottom of the enclosure to secure it to the slab with 3/8" concrete anchors

Use a length of 2" x 2" on the interior latch side of the enclosure for a moulding door stop

Paint the finished enclosure with BEHR flat espresso bean paint (or equivalent)
